# SPECTRUM SYNERGY PRO

Surface material with microfiber structure provides optimum grip and excellent ball control.

Multi-layered X2 lamination increases the rebound and softness of the ball.

Textile lamination provides excellent roundness and supports the stability and robustness.

The latex bladder with textile lamination prevents over pumping while minimising air loss.

**SYNERGY**, the unique handball technology from Kempa.

The innovative production procedure and revolutionary non-slip material improves the roundness and guarantees high form stability.

**The result:** more **GRIP**, better **FEEL FOR THE BALL**, better **CONTROL**.

In the interest of better readability, we refrain from using both the masculine and other forms in the absence of gender-neutral wording. The chosen masculine formulations therefore apply without restriction to the other genders as well.

Our main catalogues are printed with an innovative UV printing solution to achieve improved recyclability. Thanks to the use of a new type of ink series, the printing ink can be removed more easily in the recycling process, enabling optimal recycling management.

The paper we use for printing, Soporset Premium Offset, has been certified according to the paper specification OCR (ISO 1831:1980), high opacity, with volume, EU Ecolabel and FSC®.
